

WebMail

QUT's web based email service WebMail (<https://mail.qut.edu.au/>) provides staff and students with a convenient way to read and send QUT email from anywhere in the world using a web browser. WebMail can be used to set an "Away from QUT" message if you are away from QUT on leave for extended periods.

WebMail is the QUT recommended email client for students.

If as a staff member you have the requirement to access email from other than WebMail you should consult with Technical Services staff on the best way to achieve this. Please log a call with the IT Helpdesk on extension 84000 or if not urgent by emailing the IT Helpdesk at ithelpdesk@qut.edu.au
